

This folder is the dog face emotion dataset, which is divided into four main folders. The main categories of dog emotions are happy, sad, disgust, and neutral. the number of images for each emotion is 1000, and there are 4000 dog face emotion images in total. All the data in this dataset are sourced from online.

This dataset achieves better experimental results than ResNet-50 on DFER model. We welcome all research and exploration related to dog face emotions on the DFER dataset.
